

Quality Policy

Mission: To provide computational solutions for better decision making and knowledge management in healthcare, keeping things simple and eliminating unnecessary overhead, to get straight to the point.

Vision: To be a reference in the Medical Imaging field, for creating fast and smart healthcare processes.

Values:

Empowerment: BMD creates added value products that make the difference daily.

Innovation: BMD understands your needs and allows you to be involved in the innovation process.

Focus: BMD focuses on clients' needs and strives to provide straightforward and high-performance solutions for their day-to-day challenges.

Strategic goals: We want to create new strategies and innovative features that allow our clients and our organisation to be three steps ahead. Our main goals are:

- To understand our clients' needs and allow them to involve them in our innovation process;
- To create added value products that can make the difference daily;
- To create innovative products that could be integrated into traditional workflows;
- To create sustainability to support our clients' needs through strategical and always updated products;
- To have a strong collaboration with Universities, R&D institutes and other companies to improve the processes and changes in healthcare.

BMD is committed to delivering services that meet customer requirements and expectations, by continually developing and improving methods and processes, with the main goal of always exceeding clients' expectations,

We commit to comply with the requirements involving the EN ISO 9001:2015 and EN ISO 13485:2016 certification standards and multiple regulatory requirements related to our activity.

Additionally, we commit to following the market's best practices and our desire to continually improve our services and products.

On behalf of BMD Software,

Dr. Luís A. Bastião Silva (CTO)
