

PACScenter

A complete **collaborative medical imaging** platform for patient studies **storage, visualization** and **sharing**, enabling **simple** and **efficient workflows**.

Why PACScenter?

Fully web-based workstation

Access medical imaging studies from multiple institutions with a native-like experience. Use advanced diagnosis tools, report and share instantly.

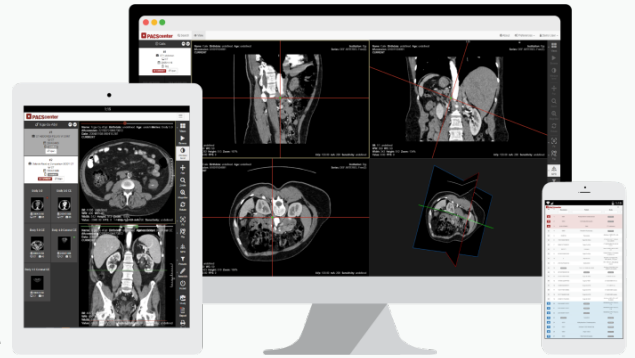

DICOM in the Cloud

Easily and securely access and diagnose medical imaging studies from connected institutions and respective patients.

Healthcare coordination with reduced costs

Build a virtual network of specialized physicians and healthcare institutions for improved diagnosis, reducing supplies costs.

Powerful, yet simple.

Collaborative

Instantly share studies and reports with healthcare professionals and patients, with study anonymization.

Multi-reporting

Easily create custom reports with key images, audio and text and add multiple reports to one study.

Advanced diagnostic tools

Convert data from an imaging modality acquired in a certain plane into another plane (MPR) and analyse it from all perspectives.

Organization management

Remotely manage user roles, authentication methods, archives, shortcuts, labels and much more.

Hanging protocols

Determine the series of actions for each modality for optimized analysis.

Integration and customization

Interoperability with VNAs, AI, third-party systems and tailored customizations to your needs.

Ready for the most challenging tasks.

Computed
Tomography

Computed
Radiography

Magnetic
Resonance

Mammography

Ultrasound

X-Ray

Who can use PACScenter?

Hospitals

Clinics

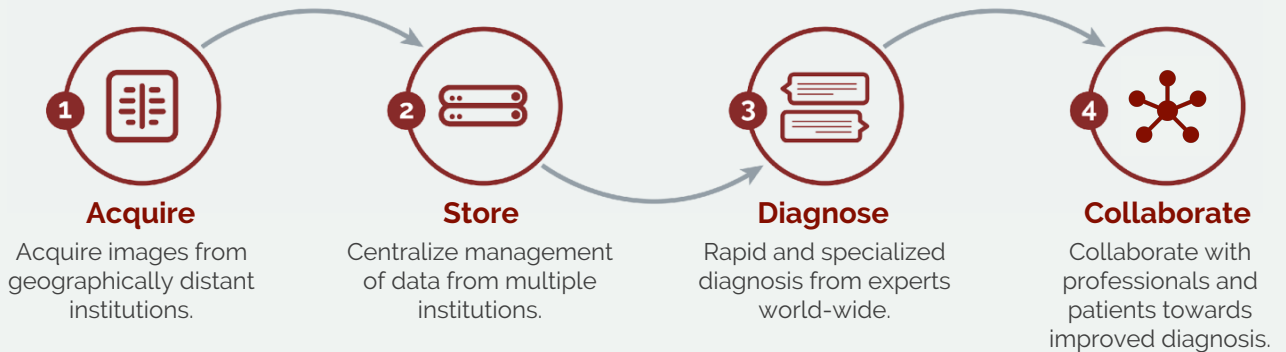

Diagnostic Centers

Imaging Centers

Build a **network** of **institutions** and healthcare **professionals**, creating agile **partnerships without** having to deal with the **complexity** of technical solutions.

Dramatically improve medical imaging management.

Multidimensional value proposition.

Imaging center

- Reduce IT and supply costs
- Enable external specialists collaboration
- Provide the best diagnosis with improved collaboration between healthcare professionals

Healthcare professional

- Bulk manage studies
- DICOM Router/Store & forward
 - Create revision worklists
 - Study anonymization
- Perform diagnosis for several imaging centers remotely

Patient

- Remote access to reports
- No need to carry physical supplies to share imaging studies
- Rapidly share studies with other healthcare professionals for second opinions
